

Sarfraz Hameed

CYBERSECURITY ANALYST & AGENTIC AI
ARCHITECT

Location: Lahore, Pakistan **Email:** sarfrazhmeed@gmail.com

Phone: +92 3463111088

PROFESSIONAL SUMMARY

Cybersecurity professional and Computer Science undergraduate specializing in the intersection of network defense and Agentic AI automation. Proven ability to architect proactive SecOps solutions, automate complex enterprise workflows using n8n, and deploy zero-trust infrastructure. Seeking to leverage a hybrid skill set in vulnerability management, automated incident response, and enterprise networking to drive operational resilience.

EXPERIENCE & VIRTUAL INTERNSHIPS

MasterCard

2026

Cybersecurity Virtual Intern

- Participated in simulated enterprise threat modeling and security awareness protocols.
- Analyzed phishing indicators and explored defensive strategies against social engineering attacks within corporate financial networks.

ANZ Australia

Aug 2024

Cybersecurity Analyst Virtual Intern

- Conducted targeted social engineering investigations and human-layer risk analysis.
- Supported complex digital forensic processes and incident response protocols.

TCS Australia

Feb 2024 - Jul 2024

IAM Virtual Intern

- Evaluated enterprise Identity & Access Management (IAM) strategies, identifying critical access gaps.

- Designed custom IAM frameworks scalable across large enterprise infrastructures.

APPLIED ENGINEERING PORTFOLIO

Autonomous AI Hotel Concierge 2026

- Developed an intelligent autonomous assistant using the Azure AI Foundry SDK.
- Implemented LLM function-calling mechanisms with mock tools to dynamically manage complex user requests, such as querying dining table availability and processing dynamic hotel reservation workflows.

Enterprise Healthcare Network Architecture 2026

- Designed and configured a scalable enterprise network architecture in Cisco Packet Tracer, implementing strict ACLs, OSPF, VLANs, and NAT routing.

AI Phishing Detection Dashboard 2026

- Engineered an interactive threat analysis application integrating Google Gemini and VirusTotal APIs to actively scan and evaluate emails, URLs, and real-time security indicators.

BizFlow Pro: AI Business Document Automation 2025

- Engineered an AI-powered enterprise application designed to ingest, classify, and extract critical operational data from unstructured business documents.

EDUCATION & CERTIFICATIONS

COMSATS University Islamabad, Lahore Campus Expected 2028

Bachelor of Science in Computer Science (BSCS)

- **Oracle AI Agentic Foundation Associate** - Completed
- **Microsoft AI Agent Specialization Series** - Course 1: AI Agent Fundamentals with Azure AI Foundry
- **Google Professional Cybersecurity Certificate** - Completed

TECHNICAL COMPETENCIES

Security & Infrastructure

Network Security & Firewalls
Enterprise Networking & ACL/DHCP
Vulnerability Triage & SecOps
Identity & Access Management (IAM)
Wireshark & Packet Tracer

Software & AI Engineering

Agentic AI Architectures & Multimodal LLMs
n8n Workflow Automation
Python, Java, PostgreSQL
HTML & CSS
